RESUME SUMMARY

Passionate Python developer with strong expertise in software development. Skilled in building efficient solutions and solve real-world challenges. Committed to continuous learning, and enhancing problem-solving.

EDUCATION

KIT - Kalaigarkaranidhi Institute of Technology, Coimbatore, B. Tech Artificial Intelligence and Data Science

- GPA: 7.87
- 10th Grade: Percentage – 100
- Diploma Grade: Percentage - 88
- **Coursework:** Introduction to AI, Introduction to ML, Database Management System, Full Stack Development

SKILLS

Technical Skills: Python, C, Basics of Data Structure, SQL, HTML, CSS, Java script, Basic of react ,Node.js

Skills: Problem Solving, Team Work, Handle Pressure, Time Management

Code chef rank: current: -1367 max: -1367

Languages know: English , Tamil

Leetcode solved problems : 200

INTERNSHIP TRAINING

Nxtlogic software solutions: - Python with Database 19.12.2024 - 04.01.2025

Ether infotech: - Full stack Development 03.06.2025 - 23.06.2025

ONLINE CERTIFICATIONS

- Foundations of Data Structures and Algorithms (sub course 5) - course era
- Foundations of data science - course era
- Machine Learning in Production - course era
- Introduction to the Fundamentals of Databases - simplilearn

EXPERIENCE

- Attended 2 hours Hackathon (3 time)
- Every wednesday engaged in Coding Platform CodeChef (Solved more than 400 problems)
- Regular Practice - Leetcode, codechef

PROJECTS

STOCK MARKET PREDICATION - To predict real-time NSE F&O option price movements, I built an LSTM-based deep learning system that integrates Angel One SmartAPI to stream live market data, processes technical indicators (RSI, MACD, ATR, ADX), and generates actionable Call/Put trading signals with confidence scores displayed on a web dashboard.

ENTERPRISE-GRADE SDK GENERATION PLATFORM -The Smart SDK Generator is a sophisticated developer tool designed to automate the creation of client libraries for Python, JavaScript, and TypeScript. By parsing API documentation URLs directly, it produces ready-to-use SDKs, OpenAPI specifications, and comprehensive integration manuals in seconds.
